

# RATE TABLE FOR THE DECLARATION 2016

The rate table specifies a contribution by the packaging material's weight and a contribution per packaging unit. Members are required to follow the guidelines in the Declaration Manual for the relevant year.

There are two types of annual declarations:

- **The detailed declaration** : the standard declaration
- **The sector-specific declaration**: optional declaration for Members that put on the French market fewer than 180,000 consumer sales units per year (defined as a unit of packaged product that a consumer can buy separately from others.).

## **A** DETAILED DECLARATION RATES

For each packaging unit (component of packaging that may be separated from the product at time of its consumption or use by an household), the contribution is determined by adding the contribution by weight and the contribution per unit.

### → Contribution by weight of material

<b>Steel</b>	€3.15 ct/kg
<b>Aluminium</b>	€9.28 ct/kg
<b>Paper &amp; Cardboard</b>	
Cardboard	€16.33 ct/kg
Brick pack	€17.04 ct/kg
<b>Plastics</b>	
Clear PET bottles and jars	€24.22 ct/kg
Other bottles and jars	€24.47 ct/kg
Other plastic packaging	€28.06 ct/kg
<b>Glass</b>	€1.21 ct/kg
<b>Other materials</b>	€23.29 ct/kg

For multi-material packaging, every packaging unit contributes based on the material that makes up more than 80% of its weight. A packaging unit that contains no majority material contributes based on each material it is made of.

For multi-layered packaging, every packaging unit contributes based on the material that makes up more

than 80% of its weight. If there is no majority material, each material in the layers contributes based on the percentage of the total weight of the multilayer it represents.

### → Contribution per packaging unit

Contribution per unit (component of packaging that may be separated from product upon consumption or use by household) is a sliding flat rate:

<b>From 0 to 0.1 g inclusive</b>	€0.009 ct/unit
<b>From 0.1 g exclusive to 0.5 g inclusive</b>	€0.027 ct/unit
<b>Over 0.5 g</b>	€0.061 ct/unit

→ **Once the contribution by weight of material and the contribution per packaging unit have been added, the following rules then apply:**

### 1. RECYCLED PAPER OR CARDBOARD PACKAGING

A 10% discount is applied to the contribution by weight of material for paper or cardboard packaging containing over 50% recycled fibres. To receive the discount, Members must provide proof in the form of a certificate from the packaging supplier.

### 2. PENALTY FOR DISRUPTIVE PACKAGING

**A 50% penalty will be added to the total contribution** for the packaging described below because of the loss of quality the final recycled materials incurs.

- glass packaging with a porcelain or ceramic stopper;
- drink cartons with paper & cardboard as the majority material but which contain less than 50% fibres;
- "reinforced" paper & cardboard packaging;
- Bottles with PET as the majority material that also contain aluminium, PVC or silicon (with a

density greater than 1). PET bottles with hybrid lids (aluminium and plastic) that must be completely removed to consume the product are no longer classified as disruptive since the 1st of January 2014.

This list is subject to revision, in which event the updated list will be circularised.

### 3. PENALTY FOR NON-RECOVERABLE PACKAGING OR PACKAGING IN THE SORTING GUIDELINES WITHOUT A RECYCLING CHANNEL

**A 100% penalty will be added to the total contribution** for non-recoverable packaging (earthenware, porcelain, ceramic) or, for packaging included within the sorting guidelines but without recycling channel (i.e. plastic bottles that are not in PET, HDPE or PP, glass that is not soda-lime).

### 4. AWARENESS BONUS

#### ■ The On-Pack bonus

**A bonus of 8%** of the total contribution of the Consumer Sales Unit (means the unit of a packaged product that a consumer can buy separately from others) is granted for an **"On-Pack"** awareness measure, i.e. if the packaging includes a sorting guideline meeting the standards defined by Eco-Emballages.

**A bonus of 4%** on the total contribution of the Consumer Sales Unit is granted for an awareness measure through affixing a **QR code** on the packaging which is linked to a sorting guideline meeting the standards defined by Eco-Emballages. The use of a QR code is reserved exclusively for small packagings.

The On-Pack bonus of 8% cannot be combined with the 4% QR code bonus.

### ■ The Off-Pack bonus

A bonus of 4% on the total contribution of the Consumer Sales Unit is granted for the following "Off-Pack" sorting awareness-raising measures: TV / radio (minimum of 300 GRP), posters (minimum of 1000 GRP), press (minimum of 150 GRP), digital medium with purchase of space (campaign covering minimum 20% of the chosen target with a minimum of 20 million "impressions" = number of displays of the advertisement / opportunities to see the campaign).

The "On-Pack" bonus of 8% can be combined with the "Off-Pack" bonus of 4%.

## 5. REDUCTION BONUS

A bonus of 8% on the total contribution of the packaging unit in question is granted for measures for **reducing environmental impacts** meeting the standards defined by the Accredited Company and described below:

- Iso-material and iso-functionality weight reduction;
- Iso-material and iso-functionality volume reduction;
- Deployment of refills;
- Reduction in the number of units of a single Consumer Sales Unit,
- Removal of a non-majority material from a multi-material packaging component;
- Switching from multi-material plastic packaging to PET mono-materials;
- Switching to precutting of plastic sleeves (excluding PVC and PET and covering at least 80% of the body of the packaging);
- Removal of the black carbon dye in the outer layer.

An additional 4% bonus is granted if the reduction is documented and published in the dedicated catalogue. For a single measure, the bonus may therefore be as much as 12%.

If several measures for reduction at source are implemented for the same unit, the bonus cannot be combined.

## **B** RATES APPLICABLE TO THE SECTOR-SPECIFIC DECLARATION

- For each product family listed in the declaration you must provide **the number of Consumer Units** (the smallest unit a consumer can consume) placed on the French market.

### ■ The contribution per product family in Year N

equals the number of Consumer Units placed on the market, multiplied by the contribution per unit applicable to the product family in Year N as set in the rate table. The contribution for Year N is defined as the total sum of contributions for all product families placed on the market in Year N.

- The product family contribution **rates** by unit are listed in the declaration table below.

## **C** INVOICING MINIMUM

In the event of an annual contribution due of less than €80 plus VAT, a minimum amount of €80 plus VAT will be invoiced.
